POLICY FOR
GREEN CAMPUS INITIATIVE

.....
(from 2020-21 to 2024-25)

GREEN CAMPUS INITIATIVE POLICY

A Green Policy is the commitment to sustainability and environmental management. Having a formal green policy shows our employees for managing environmental issues. A Green Campus is where natural cordial practices and instruction consolidate to advance maintainable and eco-accommodating practices in the grounds. The green grounds idea offers an organization the chance to lead the pack in reclassifying its natural culture and growing new ideal models by making practical answers for ecological, social and monetary needs of the humanity.

A green policy usually contains :

- 1 Cleanliness in and around the campus and waste minimization
- 2 Water conservation and management including rain water harvesting, etc
- 3 Using Energy Efficient Light Bulbs.
- 4 Planting trees for preserving environment in campus.
- 5 Complete Ban on polythenes at Campus.
- 6 Institute Community Garden.
- 7 Introduce green challenges for employees and students by observing 'No Vehicle Day' on every Friday

Greening the grounds is about clearing endlessly inefficient wasteful aspects and utilizing traditional wellsprings of energies for its day by day power needs, right removal dealing with, acquisition of condition well-disposed supplies and compelling reusing program. Establishment needs to work out the time bound techniques to actualize green grounds activities. These techniques should be fused into the institutional arranging and planning forms with the point of building up a clean what's more, green grounds.

Save Energy points

1. Activate power management features on your computer and monitor so that it will go into low power "sleep" mode when you are not working on it.
2. Turn off your monitor when you leave your Table.
- 3 Whenever possible, shut down rather than logging off.
4. Turn off unnecessary lights and use daylight instead.
- 5 Use LED or compact fluorescent bulbs.
6. Keep lights off in conference rooms, classrooms, lecture halls when they are not in use.

7. Use the fans only when they are needed.

8. Go paperless

Waste Management

We are providing dust bins in different locations of our campus. The waste which is collected is separated as plastic waste, paper waste and food waste. Ban on polythenes.

As plastic waste has emerged as one of the biggest environmental concerns adversely impacting the soil, water, health and well-being of citizens at large. We have taken the initiation to make The Colleegecampus "plastic free" by completely banning the plastic.

"Green Campus Initiatives "is taken by institution by planting the trees every year.
