Policy for
Sustainable Environment

(from 2020-21 to 2024-25)

Policy for Sustainable Environment

The mission of our institute is to discover how the environment affects people in order to promote healthier lives. It is, therefore, a core value of the institute to preserve and protect the environment. As we advance scientific understanding regarding the fundamental interrelationship between human health and the environment, we will proactively demonstrate our commitment to environmental stewardship and sustainable development. Environmental policies are needed because environmental values are usually not considered in organizational decision making.

An environmental policy is a written statement, which outlines aims and principles in relation to managing the environmental effects and aspects of its operations. This guide sets out the benefits of having an environmental policy. An environmental policy forms the foundation of environmental improvement. There is no standard format for writing an environmental policy, but to give it the best chance of success, it's important you plan it carefully.

Policy should contain brief statements as follows:

- A commitment to continually improve the environmental performance.
- A commitment to effectively manage your significant environmental impacts.
- Education and training of employees in environmental issues and the environmental effects of their activities.
- Use of biodegradable chemicals
- Participate in discussions about environmental issues agree to commit to environmental principles and continual improvement at the highest in the institution
- Provide a safe and healthful workplace and ensure that personnel are properly trained with the appropriate safety and emergency equipment.
- Be an environmentally responsible neighbour in the community where we operate, and correct incidents or conditions that endanger health, safety, or the environment
- Continually improve our environmental performance.
- To offer opportunities for employees and students to engage in initiatives to contribute to environmental protection.

***Policy on Utilization
Of Energy***

(from 2020-21 to 2024-25)

Policy on Utilization of Energy

The Energy usage Policy of Nilkanthrao Shinde Science and Arts College , Bhadrawati is to manage energy in such a systematic way so as to minimize its impact on the environment. The policy implies to explore the renewable energy resources to reduce the burden of the government and to find out substitute natural resources as solutions to the energy crisis. This energy policy is binding for all the components of the institution and applies to all its stakeholders and to the various activities undertaken by the institution. It will help us to embed efficiency and environmental awareness into our everyday activities, thus helping us to realize our responsibilities and commitment to conservation of natural resources and to limit its usage. Environmental awareness, to undertake green initiatives, and to conduct green literacy programmes to save energy and to protect the environment.

Policies Statement:

- ❖ To install LED bulbs in the complete campus to save energy.
- ❖ Switch off the lights, fans when not in use.
- ❖ Awareness programmes on conservation of energy which minimize or reduce energy use during the operation of a system or machine and/or production of a good or service.
- ❖ Demonstrating commitment to our community in the institute by reducing environmental impacts associated with our energy use.
- ❖ Promote the use of cost-effective, renewable energy sources whenever possible.
- ❖ Reduce greenhouse gas emissions and protect the environment.
- ❖ Improve faculty, staff, and student awareness and encourage the sharing of experiences in conservation of energy.
